Education

Degree/Certificate	Institute/Board	Year
B.Tech.	Indian Institute of Information Technology, Una	2022–2026
Senior Secondary	CBSE Board	2022
Secondary	CBSE Board	2020

Experience

UNIVO Education Pvt. Ltd. *Jul. 2026 – Present*

Product Management Intern Noida, Uttar Pradesh

- Developed an **AI Career Advisory Platform** with personalized career recommendations, skill-gap analysis, career roadmaps and program recommendations to enable **value-first** lead generation.
- Architected AI recommendation workflows across 3 layers: Rules Engine, Career Taxonomy and **RAG + LLM**, with guardrails to ensure grounded and reliable recommendations.
- Revamped BSIL's digital admission journey across **7+ system integrations**, connecting OTP, Salesforce CRM, Amizone, payments, eligibility, refunds, financing and LMS provisioning.
- Investigated **5+ program funnels** using weekly, monthly and page-level analytics to identify metric shifts, trace root causes across funnel stages and surface product optimization opportunities.

Darwix AI *Feb. 2026 – May 2026*

Product Management Intern Gurugram, Haryana

- Owned PRD requirements and KPIs for Voice Automation, mapping **5+ BFSI workflows** across leads, callbacks and loan inquiries.
- Enabled **Real-Time Agent Assist** for 50+ agents with LLM-based prompts, knowledge retrieval and contextual response recommendations.
- Monitored 6+ **GenAI** KPIs across latency, intent accuracy, adoption, resolution rate, escalation rate and usage.

Hero Fincorp *May 2025 – Aug. 2025*

Business Technology Solutions Associate Intern Gurugram, Haryana

- Collaborated with product and engineering teams to define **PRD-level requirements**, user workflows, and success KPIs for dealer portfolio and loan disbursal visibility features.
- Contributed to the product design of the **H.Ai chatbot** by mapping user intents, trigger conditions, and response flows to improve query resolution efficiency.
- Translated **complex business rules** into validation logic to standardize dealer codes across systems, reducing data inconsistencies in downstream workflows.

Projects

AI Resume Screening and Relevance Scoring System *Nov. 2025 – Dec. 2025*

Personal Project Case Study

- Designed an end-to-end AI-driven resume screening workflow with structured data extraction, relevance scoring (0–100), and explainable outputs, reducing manual screening effort for recruiters.
- Implemented semantic skill matching to surface matching skills, missing skills, and recruiter-friendly insights for faster decision-making.
- Delivered outputs via an automated Google Sheets dashboard, enabling consistent and scalable candidate shortlisting.

Photogrammetry Advanced Workflow for 3D Modelling *Dec. 2024 – Mar. 2025*

Team Project Case Study

- Designed an end-to-end workflow to generate interactive 3D models from 360° image datasets, focusing on user exploration and visual accuracy.
- Optimized the processing pipeline through automation, reducing turnaround time by approximately 35%.
- Delivered production-ready 3D assets including a campus canteen model with 75% structural accuracy and 92% color accuracy.

Additional Projects: LeonardoAI – User Retention Case Study

Skills Summary

- **Product and Analysis**: PRD writing, Requirement analysis, KPIs, Product Metrics (DAU, MAU, Churn Rate), Workflow and System design, Data Visualization, Data Refinement, Exploratory Data Analysis (EDA), A/B Testing, User Research, Cohort Analysis, RICE Prioritization, Market Research
- **Technical**: C/C++, JavaScript, React, Node.js, MongoDB, SQL
- **Tools**: Git, Docker, Postman, Swagger, VS Code, n8n ,Google Analytics 4 ,Tableau

Key Courses Taken

- **Core Courses**: Data Structures, Algorithms, Operating Systems, Database Management Systems, Computer Networks
- **Product Learning**: Product management fundamentals (Certification – Dezkr), Agile frameworks (Scrum, Kanban), Requirement writing, Data-driven decision making and Metrics-driven prioritization
